Abstract (en)

A thermosetting textile reinforcement has a warp and/or weft made from continuous textured filaments at least one of which has a different level of retraction from the other filament(s). The textile is non-woven or knitted. An Independent claim is also included for the production of the reinforcement by forming or knitting the filaments, retracting them and placing them on a thermofusible polymeric layer to be used for attaching the reinforcement to an article of e.g. clothing.

Abstract (fr)

L'invention a pour objet un support textile pour entoilage thermocollant, du type formé d'un tissu, d'un tricot maille ou d'un tricot maille tramée, dans lequel les fils de trame et/ou les fils de chaîne (1) dudit support sont formés d'au moins deux types de filaments texturés continus (2, 3) dont au moins les filaments (2) de l'un des types présentent un taux de rétraction différent de celui des filaments (3) des autres types. <IMAGE>
