Abstract (en)
A skate with in-line wheels, comprising a first front body, for supporting and locking the front part of the foot, and a second rear body, for supporting and locking at least the heel, the bodies having a first frame (209) and a second frame (213) for supporting a plurality of wheels (208,216). The first and second bodies and the first and second supporting frames are rotatably associated to each other to allow better transmission of lateral forces during sports practice. <IMAGE>
