Abstract (en)

[origin: EP0937505A1] The container and dispenser comprises a replaceable container (20) for the product to be dispensed. It is made with a top opening and designed to fit inside a shell (2) containing a pump and an actuator (17) with an outlet nozzle (18). The container is inserted through an aperture in the base of the shell (4), the lower edge of which has one or more recesses (33) to facilitate removal of the container for replacement. The container is held in place by elastically deformable vanes inside the shell which grip its neck.
