Abstract (en)

[origin: EP1136262A2] The drive mechanism for a pre-gripper has one or more sheet-(3) pick-up elements (10) which move between a transfer position (4) on the delivery table and a delivery position (6) on the gripper system (8). The sheet-pick-up elements are linearly guided by means of guide bars (1) of guide-rails between the transfer position and the delivery position.
