Abstract (en)

[origin: US6578616B2] A roll changer for splicing starting piece and end pieces of material webs to each other in an apparatus for producing hygienic products, includes carriers for web rolls, holding and guiding elements, severing elements and embossing rolls. The starting piece of a new material web can be fixed to an embossing roll. At least one embossing roll can be driven and at least one embossing roll can be moved selectively toward and away from the other embossing roll.
