Abstract (en)

[origin: US2001020664A1] The invention relates to a roll changer for splicing starting pieces and end pieces of material webs to each other in an apparatus for producing hygienic products, carriers for web rolls, and also holding and guiding elements, severing elements and embossing rolls being provided. The nub of the invention is that the starting piece of a new material web can be fixed to an embossing roll and that at least one embossing roll can be driven and at least one embossing roll can be moved toward the other embossing roll and away from it.
