Abstract (en)

The element of road barrier (10), that is described, is constituted of the followings parts: a plurality of posts (1m) that are fixed in the ground (t) and are provided of ribs of stiffening (2c); a ribbed cover (3); some reinforcement rails (4r). All this parts are connected to each other. The connection is obtained by tightening threaded elements (5q;6). The parts are shaped, dimensioned and positioned so that they oppose themselves to an impact in sequential succession. <IMAGE>
