Abstract (en)

[origin: EP1136638A1] Device (1) for supporting a post, especially a wood beam, comprises an adapter piece (2) which is inserted and fixed in a hole in the post and a supporting device which is connected to the adapter piece and has a height-adjustable adjusting element (3, 4, 5). The adapter piece has a hollow space (26) receiving at least one part of the adjusting element. The adapter piece is formed by a screw screwed into the supporting part of the post. Preferred Features: A screw end plate (23) is provided to limit the screw depth of the screw.
