Abstract (en)

[origin: EP1136644A2] The window-casement or door-leaf frame(3) is joined to the frame (4) built into the window or door (1) opening. The casement/leaf frame encloses preferably multiple glazing (10). The built-in frame on the outside of the building comprises a covering frame part (40) sealed over the outer edge of the glazing. The casement/leaf frame extends over that part of the inside of the built-in frame. A connecting profile (2) is preferably stuck or welded to the narrow side of the glazing and has a connecting arm (23) pointing outwards away from the glazing. The casement frame has a connecting part (32) placed against the connecting arm and detachably joined and preferably screwed (33) to the connecting arm
