Abstract (en)
[origin: EP1136759A2] The oven has a liner with a mainly rigid catalytic converter (7) located in the area of the vapor outlet. The converter is held in a bracket-shaped wire clamp holder (8), which partially surrounds it and is in turn held fixed in fastener elements (20). The holder has a clamp section engaging in a groove or undercut (18) in the converter, and two projecting fastening sections with hook or eye-shaped ends. The converter has a smaller cylindrical section (17).
