Abstract (en)

[origin: WO0026028A1] A method of fusion bonding together preformed thermoplastic bodies (41, 42, 44) by means of electrical heating current passed through an electrical heater wire (43) carried in one body (44) to heat contacting surfaces of the bodies sufficiently to weld them together, and the assembly produced by such method, characterized in that the electrical heater wire is of a sinuous configuration having sinuous turns alternating in directions perpendicular to the contacting surfaces of the bodies.
