Abstract (en)
[origin: WO0036251A1] The pole consists of a plurality of portions (1, 3), each having a constant cross section similar to that of the other portions. The dimensions of the cross section of each portion are such that one end of the portion (3) can be inserted with minimum play into the end of an adjacent portion (1), and means (5, 5A, 5B) capable of forming an axial stop between two adjacent portions are provided.
