Abstract (en)

[origin: WO0033339A2] The invention relates to an energy accumulator for a step switch, comprising a slide which can be pulled upwards and a latchable switch slide that follows the movement of the pull-up slide in an elastic manner upon release. The pull-up slide and switch slide are can be respectively displaced in the longitudinal direction of a guide rod. The pull-up slide and the switch slide have a respective guide roller on one side and have a guide contour on the opposite side, whereby the guide roller of the pull-up slide is guided in the guide contour of the switch slide and vice versa.
