Abstract (en)
A bed of the type home care bed is adjustable between a position in which the bed is by means of support elements (24) firmly supported on a floor surface (26) and a position in which the bed is by means of wheels (28) engaging the floor surface (26) and the bed is thereby movable on the floor surface. The support elements (24) as well as the wheels (26) are positioned at the lower end portions of angular adjustable elements (12), the support elements (24) and the wheels (28) being displaced to and from their positions engaging the floor surface (26) by adjusting the angular position of the elements (12). <IMAGE>
