Abstract (en)

[origin: EP1138482A1] The rotary printing machine has components (18, 22, 23, 24) associated along the path of the material web (5) through the machine with hanging stations (4) where the material web can be connected to the intake element which takes up the start of the material web. The intake element comprises a movable part and a hanging segment on each hanging station.
