Abstract (en)
[origin: EP1138810A1] Reaction products (I) of 1 part polyethylene glycol (PEG) with 2 parts fatty acids having 10-12 carbon (C) atoms or their derivatives are used as additives for permanently hydrophilizing polyolefin-containing materials. Independent claims are also included for: (1) polypropylene fibers containing 0.5-10 wt.% (I); and (2) production of polypropylene fibers by mixing polyolefins with (I), heating the mixture to form a melt and spinning the melt to form fibers.
