Abstract (en)
[origin: DE10015581C1] A heat exchanger (3,5) fits in an enclosed case (1) with an opening on the front side pointing indoors. A front plate (4) locks the opening on the front side of the enclosed case and supports the heat exchanger on its side turned away from the interior space. This front plate has a heat conducting area connecting to the heat exchanger to form a heat-radiating surface.
