Abstract (en)  
[origin: EP1139044A2] Refrigerator appliance, particularly for household use, comprising a heat-insulated case (2) closed by a door (4) and a device (12) dispensing drinks outside the refrigerator appliance. The dispensing device (12) comprises a tap (13) for the output of drinks, valve means (14) suitable to control the output of drinks, and a frame (17) applied onto the external part of said door (4) of the refrigerator. The tap (13) has a dispensing mouth (15) that projects from the external profile of the door (4) of the heat-insulated case (2) and it is associated with the frame (17). The frame (17) is provided with a recessed part (18) that is suitable to receive containers of various type for their filling with drinks that are dispensed by the tap (13). <IMAGE>
