Abstract (en)

[origin: EP1139368A1] The multipolar switching modules have a number of switching modules with separable contacts. There is a shaft (32) activating transmission levers (70,72,74) of the different modules opening and closing the modules. The mechanical activation swings on handles (36,38) of the shaft, defining a third geometric axis (144) pivoting parallel to the first axis (140). The other lever part pivots on a lower pivot (66).
