Abstract (en)

A FFC (10) in which an insulation sheet (12) at its end portion is stripped to expose a conductive path (11) is inserted between first and second squeezing plates (22), (23) of a terminal fitting (20). Recessed/projected portions (32,33) complementary to each other are formed on the outer surfaces of a pair of upper and lower press dies (30,31) for pressing the terminal fitting (20). When the terminal fitting (20) is pressed by the press dies (30,31), the FFC (10) and the terminal fitting (20) are pressed together into a single unit and the squeezing plates (22,23) are formed into a zigzag configuration. <IMAGE>
