Abstract (en)

[origin: WO0040224A1] A convenient oral dosage form that contains a drug that is reversibly adsorbed to an ion-exchange resin and subsequently coated with a polymeric material is provided. Compositions of the invention are particularly advantageous for formulating acid labile drug compounds and/or drug compounds that have particularly strong and unpleasant tastes or odours. Methods of manufacturing the convenient oral dosage forms and final dosage forms that include the convenient oral dosage forms are also provided.
