Abstract (en)
[origin: WO0040310A1] The invention relates to a safety edge for skis and snowboards (1) which has indents and protruding areas (3', 3'') of variable thickness. The indents and protruding areas vary in length, width and height depending on the type of ski or snowboard concerned and provide durable support on surfaces such as snow, ice and artificial snow. The invention also relates to methods for producing a ski or snowboard having such a safety edge.
