Abstract (en)
[origin: FR2787384A1] The packaging is formed from a film like material (10) that has formed at least one peelable zone. The procedure comprises conveying striped or edged sections (20) of the material on to the film, flattening the end sections of the material such that it is secured to the film material. An Independent claim is included for a machine for manufacturing of packaging with a peelable zone.
