Abstract (en)
[origin: US6589146B1] A method of manufacturing packages based on a film (10) and presenting at least one peelable zone, the method being characterized by the fact that it comprises the steps which consist in feeding segments (20) of strip or tape of peelable material on a film (10) that is to form the wall of the package, in flattening at least the ends of each segment (20), and in fixing each segment (20) of peelable material to the film (10). The invention also provides a machine for implementing the method, and packages obtained thereby.
