Abstract (en)

[origin: DE19950214A1] The inventive structural unit (12) consists of a holding element (11) and a windscreen-wiping device (10), said windscreen-wiping device (10) being releasably fixed to the holding element (11). According to the invention, this releasable connection is configured in the form of a latch connection. A latching element (14) is configured on the holding element (11) and is elastically latched into a latch seat (13) configured on a wiper bearing (15) of the windscreen-wiping device (10).
