Abstract (en)
[origin: DE19951003A1] A first component (22) and a second component (24) of e.g. a windscreen wiper are connected via bearing journals and bearing apertures (34). The bearing journals have ramped surfaces (56), and are connected via a bearing part between the side walls (52) of the second component. The bearing apertures are long holes extending in assembly direction, and the first component supports itself in opposite direction on the bearing part via a coaxial bearing surface (38). The components are of plastic.
