Abstract (en)

[origin: FR2788043A1] The invention concerns a chain conveyor (2), for example a circular conveyor forming an internal rotating stock for a logistics installation machine (1) such as for sorting flat objects or baggage conveyor device for airport terminal or the like, the conveyor (2) chain consisting of chain sections produced from at least a chain link with fixed length, separately self-borne and guided in a guide rail (3), two adjacent sections being linked in particular by a chain link with variable and/or adjustable pitch, said conveyor having adjusting (10) and detecting means.
