Abstract (en)

[origin: WO0037443A1] A process for the synthesis of arylpyperidine carbinol intermediates and derivatives is disclosed. A preferred process embodiment provides the synthesis of intermediate compounds of structural formula (I) and structural formula (II), where X is halogen, C1-C10 alkyl, C1-C10 alkoxy, C1-C10 haloalkyl, hydroxy, or hydrogen; and R2 and R3 each is C1-C4 alkyl and R2 and R3 are the same. The compound of structural formula (I) is made by condensing a corresponding cinnamonnitrile with a corresponding diester malonate. The compound of structural formula (II) in the (+/-)-trans configuration is obtained by hydrogenating the compound of structural formula (I). The compounds of structural formula (I) and structural formula (II) are useful chemical intermediates for synthesizing 4-arylpiperidine-3-carbinols and their derivatives in (-)-trans configuration.
