Abstract (en)
[origin: WO0136496A1] A catalyst component for the polymerization of olefin of formula $\text{CH}_2=\text{CHR}$ where R is a C1-C20 hydrocarbon group, comprising a titanium compound and an electron donor compound of a formula specified below supported on a transition metal compound selected from Mn, Fe, Co, Ni and Zn. Said catalyst component gives a polyolefin having a broad molecular weight distribution (polydispersity index > 5.0) at good efficiency.
