Abstract (en)
[origin: WO0042139A1] The present invention relates to a fabric care composition containing from about 0.01 % to about 1 % fabric softening active by weight, a solvent, and the balance adjunct materials. The fabric care composition is substantially free of starch, and substantially free of silicone. The present invention also relates to a fabric care method having the steps of providing the fabric care composition described above, applying the fabric care composition directly onto a fabric, and ironing the fabric. The present invention also relates to a fabric care method having the steps of providing a concentrated fabric care composition, providing a dilution solvent, diluting the concentrated fabric care composition with the dilution solvent to form a fabric care composition, applying the fabric care composition directly onto a fabric, and ironing the fabric. The concentrated fabric care composition contains from about 1 % to about 75 % fabric softening active by weight, a solvent, the balance adjunct materials and is substantially free of starch.
