Abstract (en)  
[origin: WO0039411A1] Base (1) of a gully which is to be placed in the ground, to which base one or more pipes (6) can be connected, for draining away liquid which enters the base via a gully opening and/or for guiding through liquid which reaches the base (1) via one or more pipes (6) connected to the base to one or more further pipes which are connected to the base. The base has a base wall (2) and an outer circumferential wall (3), one or more pipe connection sockets (7) being provided in the outer circumferential wall, each for connecting a pipe (6) to an internal liquid-conveying chamber of the base. At least one of the pipe connection sockets is pivotably connected to the outer circumferential wall of the base via a pivot joint (10).
