Abstract (en)
[origin: WO0033575A1] A method of selecting graphic or video files having corresponding locators used to locate such graphic or video files using a computer. Identifiers are created and saved to memory (20) by searching an area within a web page near a graphic or video file for searchable identification terms and searching an area within a web page near links to a graphic or video for searchable identification terms. User requests for graphic or video file content are received and the database of identifiers search is initiated (22) to find graphic and video files corresponding to criteria of the user. Graphic or video file content is then provided to the user.
