Abstract (en)

[origin: EP1142792A2] The carton (1) is rectangular in shape and the glass sheets (5), which are all of the same size, are covered up. The corners of the carton contain fasteners (4), made of folded slotted sheets of cardboard, which are folded to make corner pieces which engage and hold the corners of the rectangular glass sheets. There are flexible shock-absorbing bodies (6) at the corners, between the corner pieces and the sides of the carton.
