Abstract (en)

[origin: EP1142802A1] The spring loaded plastic pusher (2) is provided with two leaf spring units (4, 5), with each of such units consisting of two leaf springs (4', 4"; 5', 5") which are approximately of the same length and are separated from one another by a small gap. The leaf spring units are laterally offset in such a way that during operation of the pusher they can freely cross one another. Also claimed is an application of the pusher in a tablet dispensing device.
