Abstract (en)
[origin: EP1143081A1] The shelter, having a basic dome shape with sides, a base (5) and a top (6), has the inner surface of each of its side modules (1) shaped so it is concave near the base and convex near the top, with a section of gradually varying curvature in between. Each module has a sandwich or multi-layer structure, with an insulating material between outer and inner walls e.g. of plastic, composition material or metal. The modules are fastened together by standard fixings such as screws, rivets or adhesive.
