Abstract (en)

[origin: EP1143204A2] A container for flush-mounting, particularly for air-conditioning system mounting, comprising a box-like containment body (2) for refrigeration pipes and a power supply cable; a substantially funnel-shaped condensation conveyance element (12) is associable in a downward region with the box-like body (2) so that it can be removed and rotated through 180 DEG . The conveyance element (12) has an outlet (14) which is arranged at a lateral end and is orientated horizontally or is slightly inclined downwardly. <IMAGE>
