Abstract (en)
An illuminated push-button switch has a microswitch (10) and a lampholder (11) mounted at an inner end of a tubular body (1). A push-button (6) at an outer end of the body (1) moves an inner slider (7) on to an operating member (13) of the microswitch (10). A printed circuit board (26) is mounted on one side of the microswitch (10). Terminals (43, 44, 33) of the microswitch (10) and terminals (27, 28) of the lampholder (11) are connected to the printed circuit board (26) and the board (26) has transversely projecting prongs (29) which can be engaged with a terminal connector. <IMAGE>
