Abstract (en)

[origin: CA2343466A1] The invention relates to a connecting unit for angle-adjustable connection of a first and a second enclosure. The unit comprises a connecting arrangement for angle-adjustable connection of a first and a second enclosure, the arrangement comprising: a first support for the first enclosure and a second support for the second enclosure, said first and second supports articulately connected, and having a common pivot axis; and an angle-adjustment device for adjusting an angle of the first and second supports with respect to each other around the common pivot axis, and for maintaining the adjusted angle.
