Abstract (en)

[origin: US6487727B1] The garment (1) intended for children who are enuretic or are undergoing toilet training, or for incontinent persons, is impermeable but has a permeable internal face (3) coming into contact with the skin. It incorporates sealing devices (4) for preventing the flow of urine outside the garment. The garment can also incorporate pieces of absorbent material (5) disposed on the internal face (3) of the garment (1) close to the sealing devices (4).
