Abstract (en)
[origin: CA2351320A1] An eyeglass holder (10) for securing eyeglasses (102) to a material (100) including a first clip (12) for removably attaching the eyeglass holder (10) to the material (100). The first clip (12) including a first arm (18). The eyeglass holder (10) further including an eyeglass support (14) pivotally attached to the first arm (18) for receiving and removably securing a portion of the eyeglasses (102) thereto. The support (14) being rotatable about a first axis (a-a) and a second axis (b-b). The second axis (b-b) is offset from the first axis (a-a), thereby allowing the support (14) to maintain a vertical position with regard to gravity substantially independent of a position of the first clip (12).
