Abstract (en)  
[origin: WO0038998A2] A carton and blank for forming a carton for beverage containers which carton includes a series of hinged panels forming a sleeve and end closure panels hinged to at least one associated hinged panel for closing, at least in part, the opposite ends of a sleeve. The said carton includes handle means by which the carton can be carried, said handle means comprising a strap connected to opposed end panels having a user part which is in substantially co-planar relationship with said one hinged panel when in a stored condition. The strap is so connected at its opposite ends to said end closure panels as to provide a surplus of material to enable said user part to be brought into a position of use. The invention further comprises a carton for holding a plurality of articles in a group, which carton comprising top, opposed side walls and a base, hingedly interconnected together to form a tubular structure wherein at least one said side wall comprises a displaceable zone arranged to protrude out of a plane of the side wall to accommodate a portion of an adjacent article. The displaceable zone comprises a multiplicity of connected sections each occupying a different plane to a next adjacent section.  
[origin: WO0038998A2] A carton and blank (10) for forming a carton for beverage containers which carton includes a series of hinged panels (12, 14, 16, 18, 20, 22) forming a sleeve and end closure panels (34, 36, 38, 40) hinged to at least one associated hinged panel (12, 14, 16, 18, 20, 22) for closing, at least in part, the opposite ends of a sleeve. The said carton includes handle means by which the carton can be carried, said handle means comprising a strap (38) connected to opposed end panels (38, 40) having a user part (74) which is in substantially co-planar relationship with said one hinged panel (18) when in a stored condition. The strap (98) is so connected at its opposite ends to said end closure panels (38, 40) as to provide a surplus of material to enable said user part to be brought into a position of use.
