Abstract (en)

[origin: WO0003209A2] The invention concerns a device (1) for displaying various parameters concerning water consumption in a supply conduit (2) downstream part (2a), comprising a volumetric sensor (3) arranged in supply conduit (2) upstream part (2b), a data processing unit (4) for processing data supplied by said volumetric sensor (3) and display means for displaying said data. The invention is characterised in that it further comprises means for triggering a visual and/or sound alarm when there is overconsumption relatively to a predetermined threshold.
