Abstract (en)

[origin: EP1145701A1] A massage device includes a frame, a threaded rod vertically provided in the frame and engaging a move means, which has two sets of massage wheels, and two move wheels at two sides to move along two rails provided at two sides of the frame. One or two direction boards are fixed behind the frame to control moving direction, right and left and/or back and forth, of a second set of massage wheels when the moving means engaging the threaded rod is moved up and down by a gear fixed at the lower end of the threaded rod and engaging the shaft of a motor fixed beside the frame. <IMAGE>
