Abstract (en)

An improved machine (1) for cleaning air vents, of the type that is introduced into air vents for cleaning the same and which moves by means of casters or tracks (5) and is provided with a camera (7) for recording the inside of the vent, which is situated on the machine and connected to an outside monitor, the machine being controlled from the outside of said vent. Cleaning of the vent is carried out by means of rotating devices (3) which eliminate dirt from the vents and which are also controlled from the external control panel. <IMAGE>
