Abstract (en)
In a device for applying a banderole (27) to the circumference of a rotating cheese (14), which device comprises rotation means for rotating the cheese, a strip-application device (7) for applying a banderole strip to the circumference of the rotating cheese (14), a pressure-exerting member (24) for pressing the banderole strip which has been supplied by the strip-application device (7) onto the cheese, a holding member (2) for holding a banderole stock reel (1), guide means (6) for guiding the banderole off the banderole stock reel (1) towards the strip-application device (7) and cutting means (15) for cutting off the banderole strip between the strip-application device (7) according to the invention the rotation means comprise a vacuum turntable (20) with vacuum means for retaining and positioning the cheese, thus reducing damage to in particular wet cheeses which have just been plasticized. <IMAGE>
