Abstract (en)
[origin: EP1145982A2] A packing assembly in which a cassette case (1), having a tape cassette stored therein, is wrapped by a transparent outside wrapping film (2) having a front seal portion (3) in which the outside wrapping film (2) is overlapped at the body front (1b) of the cassette case (1) and sealed by melt-welding. A solid-printed portion (4) formed on the film fold upper member (2b) of one side portion, serves as a tear-strip portion (6) to open the outside wrapping film. The remaining portion of the film fold upper member (2b) forms a side seal portion (5) in which the film fold upper member (2b) except the solid-printed portion (4) is sealed to the outside wrapping film of the lower layer by melt-welding. <IMAGE>
