Abstract (en)
[origin: EP1146494A1] The invention relates to a method for operating several hand-held measuring devices (2), according to which all said hand-held measuring devices (2) are synchronised with one another by a central control signal (11) which can start the measurement recording of the said devices (2). According to the method, a hand-held measuring device (2), which is operated as a master device, emits the control signal (11) to itself and in particular in a wireless manner, to all other hand-held measuring devices (2) which are operated as slave devices.
