Abstract (en)
[origin: EP1147816A2] The appliance has a distributor plate (12) with nozzle (19) and valve unit. This is formed as a parallel slide gate valve with at least one intake slide (15) and one outlet slide (13). At least one intermediate plate (14) with a material-containing channel (18.1) is located between the valves. The medium also has a pressure plate (16) with channel (18), charged by a clamping module (17). The slide surfaces have projecting slide sections, which are replaceable.
