Abstract (en)  
Arrangement comprises optical emitter and receiver devices (7, 8). At a distance from emitter and receiver is the main guide support plate (11) that also holds the control device. Emitter and receiver devices are held in the plane of the main guide plate and are connected via rigid optical wave guides (9, 10) to the measurement location for detection of mail items (12).

Abstract (de)  
Die Anordnung zur Poststückdetektierung nutzt den Einsatz von starren Lichtleiterelementen (9, 10) zwischen Messort und den Sender- und Empfangsmitteln (7, 8) auf der Hauptleiterplatte (11) und dient zur Detektierung des Frankiergutes nach dem an sich bekannten Durchlichtprinzip.
