Abstract (en)  
[origin: JP2001350561A] PROBLEM TO BE SOLVED: To actualize a user interface which is easy to use in the Limited space of a console by providing a function control means recognized with a symbol capable of changing the function of a context. SOLUTION: This describes a function controller having at least one selector which can move between at least two selection position. The function controller has actuators that a user can control and at least one of them displays different functions at at least two different position of a symbol 19 of a selector 10. The symbol 19 relates to the movement of at least one selector 10 and displays the functions of at least several actuators operating different functions.
